
2025 Blue Cross and Blue Shield Service Benefit Plan - Standard and Basic Option
Section 3. How You Get Care
Page 18

Hospital – An institution, or a distinct portion of an institution, that:

1. Primarily provides diagnostic and therapeutic facilities for surgical and medical diagnoses, treatment, and care of injured and sick persons provided or supervised by a staff of licensed doctors of medicine (M.D.) or licensed doctors of osteopathy (D.O.), for compensation from its patients, on an inpatient or outpatient basis;
2. Continuously provides 24-hour-a-day professional registered nursing (R.N.) services; and
3. Is not, other than incidentally, an extended care facility; a nursing home; a place for rest; an institution for exceptional children, the aged, those who suffer from substance use disorders; or a custodial or domiciliary institution having as its primary purpose the furnishing of food, shelter, training, or non-medical personal services.

Note: We consider college infirmaries to be Non-Preferred (Member/Non-member) hospitals. In addition, we may, at our discretion, recognize any institution located outside the 50 states and the District of Columbia as a Non-member hospital.

Freestanding Ambulatory Facility – A freestanding facility, such as an ambulatory surgical center, freestanding surgicenter, freestanding dialysis center, or freestanding ambulatory medical facility, that:

1. Provides services in an outpatient setting;
2. Contains permanent amenities and equipment primarily for the purpose of performing medical, surgical, and/or renal dialysis procedures;
3. Provides treatment performed or supervised by doctors and/or nurses, and may include other professional services performed at the facility; and
4. Is not, other than incidentally, an office or clinic for the private practice of a doctor or other professional.

Note: We may, at our discretion, recognize any other similar facilities, such as birthing centers, as freestanding ambulatory facilities.

Residential Treatment Center – Residential treatment centers (RTC) are licensed by the state, district, or territory and may be accredited, where required, by a nationally recognized organization to provide residential treatment for medical conditions, mental health conditions, and/or substance use disorder. Accredited healthcare facilities (excluding hospitals, skilled nursing facilities, group homes, halfway houses, and similar types of facilities) provide 24-hour residential evaluation, treatment and comprehensive specialized services relating to the individual's medical, physical, mental health, and/or substance use disorder therapy needs. RTCs offer programs for persons who need short-term transitional services designed to achieve predicted outcomes focused on fostering improvement or stability in functional, physical and/or mental health, recognizing the individuality, strengths, and needs of the persons served. If you have questions about treatment at an RTC or need assistance coordinating this care, please contact us at the customer service phone number listed on the back of your ID card.

Blue Distinction® Specialty Care

Blue Distinction Specialty Care, our centers of excellence program, focuses on effective treatment for specialty procedures, such as: Bariatric Surgery, Cardiac Care, Knee and Hip Replacement, Spine Surgery, Transplants, Cancer Care, Cellular Immunotherapy (CAR-T), Gene Therapy, Maternity Care, and Substance Use Treatment and Recovery. Using national evaluation criteria developed with input from medical experts, the Blue Distinction Centers offer comprehensive care delivered by multidisciplinary teams with subspecialty training and distinguished clinical expertise. Providers demonstrate quality care, treatment expertise and better overall patient results.
